

FAHEEM WAKEEL

React Native & Web3 Developer | Front-End & Blockchain Specialist

+92 3186818588 @ faheemwakeel247@gmail.com https://www.linkedin.com/in/faheem-wakeel-b70770275/ https://faheemwakeel.vercel.app/

SUMMARY

I am a passionate and detail-oriented React Native & Web3 Developer with a strong foundation in React.js and modern JavaScript technologies. I possess skills in building robust web and mobile applications, integrating blockchain features, and ensuring responsive and user-centric designs. I specialize in developing decentralized applications (dApps), NFT platforms, and multichain wallet systems, and I am eager to collaborate on innovative projects

EXPERIENCE

React Native Developer

Capstone Technology Group

03/2025 - Present Remote

A technology group specializing in mobile and web solutions

- Developed cross-platform mobile applications using React Native, ensuring seamless performance on both iOS and Android devices
- Built secure crypto wallets (single-chain and multichain) using React Native.
- Integrated Ethereum, BSC, and Polygon smart contracts in React Native apps via Ethers.js and Web3.js.
- Implemented secure key storage, biometric authentication, and WalletConnect using React Native libraries.
- Developed multichain interoperability (Wormhole, LayerZero) and optimized mobile wallet performance in React Native.

React Native Developer

Blockmob

07/2024 - Present Islamabad, Pakistan

A technology group specializing in web3 mobile and web solutions

- Designed and developed mobile crypto wallets using React Native with advanced UI/UX for seamless blockchain interactions.
- Integrated Ethereum, BSC, and Polygon blockchains in React Native apps using Ethers.js and Web3.js libraries.
- Implemented secure key management, integrated WalletConnect, and enabled biometric authentication (Face ID / Touch ID) using React Native modules.
- Optimized wallet performance on mobile by leveraging React Native features such as the Hermes engine, background fetch, and CodePush updates.

React Native Developer

Softcare

06/2023 - 03/2024 Islamabad, Pakistan

A technology group specializing in mobile and web solutions

- Led the development of complex mobile applications using React Native, focusing on performance optimization and smooth user experience.
- Designed and implemented state management solutions using Redux and Context API to handle dynamic app data in real-time.
- Integrated third-party services and APIs (including RESTful and WebSocket) for seamless real-time communication, data synchronization, and background task execution.

EDUCATION

Bachelor of Computer Science

PMAS-Arid Agriculture University Rawalpindi

06/2020 - 06/2024

TOP PROJECTS

GAYA Wallet

11/2024 - Present

A Secure and user-friendly multi-chain crypto wallet enabling users to manage digital assets seamlessly. Features include wallet creation, token swapping, and blockchain interoperability

- Created a multichain wallet supporting Ethereum and Solana chain
- Used Ethers.js for blockchain interaction and React Native for mobile app interface
- Enabled interchain transactions using secure wallet integration and smart contract calls

NAITRAM

07/2024 - Present

A cutting-edge platform revolutionizing event ticketing through NFT technology

- Built an interactive NFT marketplace interface using React.js and Ethers.js
- Enabled Create wallet, minting NFTs, and displaying NFT metadata from smart contracts
- Integrated WalletConnect for seamless user onboarding
